SOFIOUEST: A SINGULAR PURPOSE AND HISTORICAL VALUES

***“SOFIOUEST contributes to the Group's influence SIPA
OUEST-France through an investment humanely
and socially responsible”***

Because we are an investment company originally associated with the Association for the Support of the Principles of Humanist Democracy, we keep alive the forces leading to a society based on sincerity, respect, responsibility and mutual support.

Because we believe that entrepreneurs have the power to transform the world, we are committed to people who work for the thriving of the individual, for social cohesion, and for preservation of the planet.

Because we consider ourselves responsible for future generations, we believe that a sustainable approach creates value for all and accelerates our financial profitability.

Because we demand good will and respect for women, men and their projects, we are able to take a long-term view of our actions.

Because we are convinced that investing and being invested go hand-in-hand, we provide both human and financial support to the entrepreneurs who place their trust in us. We create communication and strong ties between the members of our ecosystem.

Because a diversified portfolio allows us to combine ambition and prudence, we invest in technological innovation, growth capital and real estate, either directly or through investment funds.

***Because the independence and sustainability of our main
shareholder are important for freedom of the press,
we must succeed.***

Daily, in its investment activities, SOFIOUEST cultivates and puts into action the values of sincerity, respect, responsibility and solidarity.

To support and care about companies in good times and bad. Facilitate the sharing and pooling of solutions in our ecosystem to become **more effective** and efficient.

Supportive

Sincere commitment: A key component of all our relationships. Our approach goes well beyond words, to a necessary alignment of our positions, decisions, and actions with our values.

Sincere

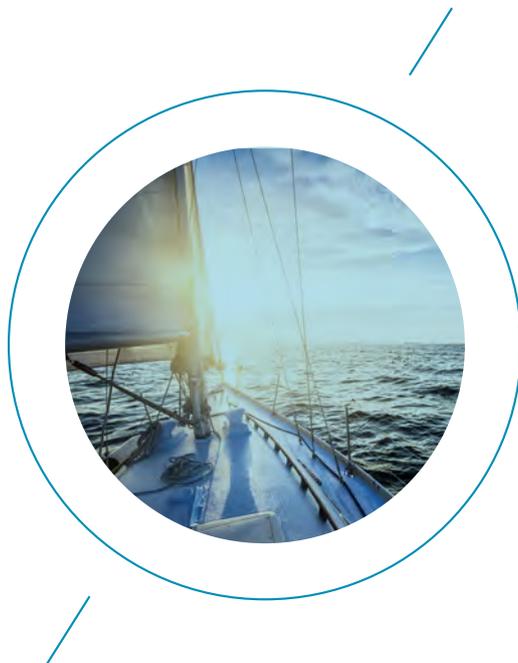

Respectful

To be a committed investor alongside the entrepreneurs, **while respecting their plans, their personality, and their individual strategy.**

Responsible

More than anything else, **being responsible** means accepting all the consequences of our work as investors. Beyond the profitability of the funds invested, it means taking into account non-financial performance indicators, and promoting this sense of responsibility throughout our ecosystem.
